📍 Ngu Hanh Son, Da Nang, Viet Nam

## BACKGROUND/CAREER OBJECTIVES

I have three years of experience working as a web and mobile developer. Javascript, PHP, Dart, Swift, MongoDB, GraphQL and etc, and the eco-system around them, such as Typescript, NodeJS, Vue, React, Flutter and Laravel are programming languages that I can use to develop projects. I started working in this field as a freelancer when I was studying at university. During that time, I created a big project at the top of Vietnam's traffic for many years.

## WORK EXPERIENCE

### Freelancer

2019 - 01/2022

#### FULLSTACK DEVELOPER

- Find and approach customers on social networks.
